PROFESSIONAL SUMMARY

SDET and Senior QA Automation Engineer with 16 years of engineering experience specializing in building scalable test infrastructure and embedding quality gates into CI/CD pipelines. Trilingual (English, Spanish, Portuguese) professional with a proven track record of migrating enterprise organizations to full automated regression using Playwright, TypeScript, and API contract testing (Pact). Recognized for achieving near-zero defect escape rates, reducing change failure rates, and accelerating deployment frequencies across distributed global teams in US, LatAm, and Brazil for the fintech, e-commerce, and SaaS sectors.

TECHNICAL SKILL

Automation Frameworks: Playwright, Cypress, WebdriverIO, Selenium WebDriver, Appium, AccelQ, Karate DSL, Robot Framework.

Programming Languages: TypeScript, JavaScript, Java, Kotlin, Python, Go, C#, Dart.

API & Contract Testing: REST, gRPC, GraphQL, SOAP, Postman, RestAssured, Pact (Consumer-Driven Contract Testing).

CI/CD & Cloud Infrastructure: Bitbucket Pipelines, GitHub Actions, Jenkins, GitLab CI, AWS (S3, CloudWatch, EC2, Device Farm), Docker, Azure DevOps.

Performance & Data Quality: JMeter, K6, PySpark, Spark, SQL, Kafka.

Methodologies: E2E Testing, Shift-Left QA, Quality Gates, BDD, TDD, DORA Metrics Optimization, AI-Driven Testing.

PROFESSIONAL EXPERIENCE

OLACLICK | Lima, Perú (Rem) SDET QA Automation Engineer (AI/ML) | feb 2026 - jun 2026

- Architected a scalable test automation framework from scratch using Playwright and TypeScript, migrating the organization from 100% manual testing to full automated regression coverage across Nuxt, Node.js, and Laravel architectures.
- Integrated automated quality gates into Bitbucket Pipelines using Infrastructure as Code (IaC) practices, eliminating deployment bottlenecks and reducing staging environment setup time.
- Executed a risk-based "QA Decision Matrix" in collaboration with Product Leads, achieving 100% API test coverage on critical payment and checkout flows without impacting release velocity.
- Established a standardized "QA Playbook" in Confluence and Jira, improving bug resolution speed and defining clear quality metrics across engineering teams.

UPWORK | San Francisco, EE. UU. (Rem) SDET | dic 2025 - feb 2026

- Delivered high-reliability automated quality solutions for global client platforms, architecting E2E testing suites using Playwright, Cypress, and microservices API testing.
- Engineered performance testing scripts using K6 to identify and resolve critical backend latency bottlenecks prior to production releases.

DEUNA | Nueva York, EE. UU. (Rem) Senior QA Automation Engineer | oct 2023 - oct 2025

- Maintained a near-zero defect escape rate in production across 80+ payment service providers (PSPs) by engineering robust API and Web automation frameworks using Playwright and Go.
- Implemented AI-driven testing components and AWS cloud execution pipelines, reducing manual configuration overhead and accelerating test suite execution.
- Upskilled engineering teams on test automation best practices, ETL validation, and PySpark data pipeline reporting.

TUL | Bogotá, Colombia (Rem) Senior QA Automation Engineer | may 2022 - jul 2023

- Implemented consumer-driven contract testing with Pact and Kotlin/Java API automation, preventing integration failures across microservices architectures.
- Built and integrated automated quality gates into CI/CD pipelines using Karate DSL, Cypress, WebdriverIO, Kafka, and AWS.
- Established automated test coverage for the Flutter mobile application using Dart-based protocols and BDD frameworks.

B89 | Lima, Perú (Rem) Senior Software Quality Engineer | mar 2020 - ene 2022

- Scaled the QA department for Peru's first neobank from scratch, leading technical evaluations and onboarding a high-performing QA automation team.
- Secured a zero-critical-bug MVP launch by designing an end-to-end API and frontend automation strategy using Cypress and WebdriverIO.
- Executed JMeter performance testing and PactJs contract validations to certify high-throughput transaction reliability for blockchain and remittance modules.

ENCORA (Avantica) | Lima, Perú - Senior QA Automation Engineer | ene 2019 - mar 2020

- Led AS400 data transformation testing for Scotiabank Canada & Peru, validating 100% data accuracy during core banking system migrations.
- Certified security and performance for the API Identity and Biometric Authentication (POK) platform, successfully passing technical audits.

NTT DATA (Everis) | Lima, Perú - QA Lead & QA Automation Lead | may 2018 - dic 2018

- Managed functional and automation QA teams for the BCP Bank Salesforce implementation, delivering high-reliability web and mobile releases.

(Previous professional experience from 2010 to 2018 at CHOUCAIR TESTING, IATECAM, NCR and FUCAPI in automation and diagnostics available upon request).

EDUCATION & CERTIFICATIONS

Bachelor of Computer Engineering, Universidade Paulista (UNIP), Manaus, Brazil (2014)

International Diploma in Project Management, ESAN University, Lima, Peru (2018)

Certifications: ISTQB Advanced Test Automation Engineer (2025), ISTQB CTFL 4.0, IBM Certified Specialist (AppScan & Performance Tester), Playwright Web Automation & Framework Training, AI-Driven Cybersecurity, Docker DevOps.

Languages: Native Spanish, Native Portuguese, Intermediate English speaker (B1>B2).
